ABOUT US

The Institute of Materials Engineering Australasia Ltd., more commonly known as Materials Australia, provides support to all materials engineering, manufacturing and research industries.

Materials engineering is one of the broadest engineering disciplines, playing a part across all industrial sectors, including mining, oil and gas, chemical, pharmaceutical, transport, automotive, food and beverage, architectural, aeronautical, water treatment, marine and medical. Major facets of materials engineering include materials selection, corrosion resistance and protection as well as welding, fabrication and joining.

With branches in Adelaide, Brisbane, Canberra, Melbourne, Perth and Sydney, Materials Australia offers seminars, training, conferences, and a wide range of technical information.

Materials Australia is a Technical Society of Engineers Australia

OUR MEMBERSHIP

Our Members

Materials Australia members are involved in all aspects of materials science, technology and engineering. Members include manufacturing technical officers, professional engineers, academics, research scientists, technical staff and students.

Our members are experts in polymers, nano and biomaterials, ceramics, metals, composites and all of their engineering applications.

There are two types of Materials Australia membership available: Individual and Corporate.

Individual members can join Materials Australia as a Student Member, Standard Member, Retired Member or a Certified Materials Professional (CMatP).

Corporate members can opt for a Standard, Premium, or Premium Plus membership package.

Become a Certified Materials Professional (CMatP) Today

Accreditation as a CMatP (subject to approval by the CMatP sub-committee) will give you recognition, not only amongst your peers, but within the materials engineering industry at large, as a scientist or engineer who maintains professional integrity, keeps up-to-date with developments in technology and strives for continued personal development.

There are now over 160 Certified Materials Professionals who lead activities within Materials Australia. These activities include heading special interest group networks, representation on Standards Australia Committees, and representing Materials Australia at international conferences and society meetings.

Individual Membership Benefits

- Accreditation as a Certified Materials Professional (CMatP) if eligible.
- Discounts on all Materials Australia conferences and training courses, including the CAMS and APICAM Conferences.
- Digital subscription to Materials Australia Magazine, our quarterly publication that is jam-packed with industry, product, technical and research news.
- Discounts on advertising in Materials Australia Magazine.
- Conferences, training courses, workshops and regular branch meetings, designed to facilitate continued professional development.
- Outstanding networking opportunities through regular branch meetings, conferences and training courses.
- Regular branch newsletters full of information on local activities.

Corporate Membership Benefits

- Discounts on advertising in Materials Australia Magazine.
- Editorial support for articles in Materials Australia Magazine.
- Digital subscription to Materials Australia Magazine.
- Free employment listings on the Materials Australia website.
- Free company listing on the Materials Australia website.
- Free company listing in the Materials Australia Magazine.
- Discounts on all Materials Australia conference tickets and booths, including the CAMS and APICAM Conferences.
- Discounts on all Materials Australia training courses and workshops.

Promote your Company

There are a number of ways to promote your company to the Materials Australia membership base:

Materials Australia Magazine: Digitally distributed nationally and internationally, our magazine is the mostly widely read within its market. The readership is highly targeted: senior decision makers with real purchasing power from major professional firms, universities, government, and research institutions. It is the perfect opportunity to promote your business directly to decision makers within the materials industry.

Materials Australia Website: With considerable traffic each month, advertising on the Materials Australia website (www.materialsaustralia.com.au) will ensure your company is seen, and recognised, by the biggest players in the Materials industry. We offer a range of options, from banner adverts to business listings.
