

Our Certified Materials Professionals (CMatPs)

The following members of Materials Australia have been certified by the Certification Panel of Materials Australia as Certified Materials Professionals.

They can now use the post nominal 'CMatP' after their name. These individuals have demonstrated the required level of qualification and experience to obtain this status. They are also required to regularly maintain their professional standing through ongoing education and commitment to the materials community.

We now have over one hundred Certified Materials Professionals, who are being called upon to lead activities within Materials Australia. These activities include heading special interest group networks, representation on Standards Australia Committees, and representing Materials Australia at international conferences and society meetings.

To become a CMatP visit our website: www.materialsaustralia.com.au
